

**VISION OF THE INSTITUTION**

To emerge as a leader among the top institutions in the field of technical education

**MISSION OF THE INSTITUTION**

- ✚ Produce smart technocrats with empirical knowledge who can surmount the global challenges
- ✚ Create a diverse, fully-engaged, learner-centric campus environment to provide quality education to the students
- ✚ Maintain mutually beneficial partnerships with our alumni, industry, and Professional associations

**VISION OF THE DEPARTMENT**

To achieve education and research excellence in Computer Science and Engineering

**MISSION OF THE DEPARTMENT**

- ✚ To excel in academic through effective teaching learning techniques
- ✚ To promote research in the area of computer science and engineering with the focus on innovation
- ✚ To transform students into technically competent professionals with societal and ethical responsibilities

**PROGRAM EDUCATIONAL OBJECTIVES (PEOS)**

**PEO 1:** Graduates will have successful career in software industries and R&D divisions through continuous learning.

**PEO 2:** Graduates will provide effective solutions for real world problems in the key domain of computer science and engineering and engage in lifelong learning.

**PEO 3:** Graduates will excel in their profession by being ethically and socially responsible.

**PROGRAM OUTCOMES**

Engineering students will be able to:

- 1. Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- 2. Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- 3. Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- 4. Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- 5. Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- 6. The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- 7. Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- 8. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- 9. Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

- 10. Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- 11. Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- 12. Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PROGRAM SPECIFIC OUTCOMES (PSOs)**

-  **PSO1: Professional Skills:** Ability to apply the knowledge of computing techniques to design and develop computerized solutions for the problems.
-  **PSO2: Successful career:** Ability to utilize the computing skills and ethical values in creating a successful career.

**COMMON EVENTS**

<b>S.No</b>	<b>Details</b>	<b>EVEN SEM</b>
1	Commencement of classes for IV Semester	12.12.2018
